

There's a Better Way!

OR

#1 Leave it to Z5

Say goodbye to inaccurate inventory counts with **Z5 VID**, a novel, patent-pending method using **AI**, unveiled in June 2023.

The Z5 Way

- 1** **HIPAA-certified Z5 videographers** capture on-site video of your hospital inventory
- 2** Videos are uploaded to a secure, encrypted cloud in the U.S., where a **remote video analysis team and AI assistant** review them to enter item details.
- 3** Our **proprietary algorithm** automatically finds the correct item pricing from your most reliable data sources such as your item master catalog and purchase order history.
- 4** View count results in **real-time**, with **robust analytics**, reporting features, toggleable views for every stakeholder, and with everything exportable to a spreadsheet..
- 5** Our software automatically attaches the relevant video clip to each counted item, guaranteeing a **fully documented and auditable** inventory process.

#2 Take control of your inventory *on your terms*

With **Z5 self-service software model**, we provide more than just a username and account access—we offer staff training and an expert inventory manager to **guide you through every step** of the inventory valuation process.

With our software you will be able to:

- **Access a Z5 mobile app** (deployed to your internal devices) **and web portal dashboard** (viewable by all stakeholders) that updates in real-time as your counts are entered.
- Count **all inventory types** (perpetual, periodic, pharmacy, med-surg., implants, equipment, and more).
- Count your inventory with or without **count sheets**.
- Conduct **year-over-year variance analysis** across facilities, departments, rooms, locations, and even individual items.
- Monitor items for **expiration** and identify **at risk inventory** on your own time.
- Perform Count **Audits**.
- Update **PAR location data**.
- And much more!

More beyond annual inventory...

As a supply chain leader, your role extends far beyond annual inventory. That's why we empower you with resources to elevate your supply chain department and showcase your stellar performance!

With our expert team and industry leading software we have lead the following projects with tremendous success:

- **Reallocation of stagnant products** between in-network facilities. (saving over \$16 million for one customer)
- **PAR implementation**
- **OR supply chain** assessment
- **Expiration** sweeps
- Inventory of equipment
- Management of **category-specific spend**
- **Installing and stocking** OR supply rooms
